

## Anti Fingerprint Liquid

### Basic Information

- Brand Name: Meilun Materials
- Model Number: SNK
- Minimum Order Quantity: 20kg
- Packaging Details: 20kg/barrel, 200kg/barrel
- Supply Ability: 1T/month

### Product Specification

- Highlight: Anti Fingerprint Liquid, AF, Antistatic anti-fingerprint liquid

## AF Anti-Fingerprint Solution Product Report

### I. Product Overview

The AF anti-fingerprint solution is a high-tech coating product designed to form a protective layer on various surfaces, providing anti-fingerprint, anti-smudge, and easy-to-clean properties. This product is widely used in electronics, home appliances, automotive interiors, glass products, and other fields, significantly enhancing the aesthetics and lifespan of these products.

### II. Product Features

#### 1. Anti-Fingerprint Performance

The AF anti-fingerprint solution creates a thin, transparent coating on the surface, effectively preventing fingerprints and oil stains from adhering, keeping the surface clean and shiny.

#### 2. Anti-Smudge Property

The coating has excellent anti-smudge properties, preventing dust, oil stains, water spots, and other contaminants from adhering, making the surface easier to clean.

#### 3. Wear Resistance

The AF anti-fingerprint coating is highly wear-resistant, maintaining its functionality and appearance over prolonged use, thus extending the product's lifespan.

#### 4. Easy to Clean

Due to its low surface energy, contaminants are less likely to adhere, and any dirt can be easily wiped off, greatly reducing cleaning difficulty and time.

#### 5. Environmental Friendliness

The product is made from environmentally friendly materials, non-toxic and harmless, ensuring safety for humans and the environment, aligning with modern green and sustainable principles.

### III. Application Areas

#### 1. Electronics

Used on screens of smartphones, tablets, laptops, and other electronic devices, the AF anti-fingerprint solution keeps screens clean and enhances user experience.

#### 2. Home Appliances

Applied to the casings and panels of refrigerators, washing machines, microwaves, and other appliances, it prevents fingerprints and smudges, keeping the appliances looking clean.

#### 3. Automotive Interiors

Used on car interiors such as touchscreens and dashboards, it reduces fingerprints and smudges, enhancing the aesthetics and longevity of the interior.

#### 4. Glass Products

Applied to glass doors, windows, and furniture, it makes glass easier to clean and keeps it bright and transparent.

### IV. Market Analysis

#### 1. Market Demand

With the widespread use of electronic devices and home appliances, consumers have increasingly higher requirements for product appearance and cleanliness. The demand for high-tech coatings that are anti-fingerprint and anti-smudge is growing steadily.

#### 2. Competitive Landscape

The market currently offers a variety of anti-fingerprint coating products, but their performance varies. The AF anti-fingerprint solution stands out with its superior performance and environmental friendliness, giving it a significant competitive advantage.

### V. Product Advantages

#### 1. Technological Leadership

Our company has an advanced R&D team and production process, continually innovating to ensure the product's performance is at the forefront of the industry.

#### 2. Reliable Quality

With a stringent quality control system and testing methods, we ensure that every bottle of AF anti-fingerprint solution is consistently reliable in quality.

#### 3. Customer Recognition

The product has been widely used in electronic devices and home appliances from several renowned brands, receiving unanimous praise from customers.

### VI. Development Strategy

#### 1. Technological Innovation

We will continue to increase R&D investment, enhancing the technical content and added value of our products, and developing new products with more robust functionalities.

#### 2. Market Expansion

By strengthening market marketing and brand building, we aim to increase our product's market share domestically and internationally, actively exploring new application areas.

#### 3. Customer Service

We provide comprehensive technical support and after-sales service, building long-term and stable customer relationships, thereby enhancing customer satisfaction and loyalty.

### VII. Conclusion

As a high-performance and environmentally friendly coating product, the AF anti-fingerprint solution has broad application prospects and market potential. Through continuous technological innovation and market expansion, our company will continuously enhance product competitiveness, providing better solutions for our customers and driving industry development.
